

CleanMyMela — Design Spec v2

Friendly cartoon-MacBook mascot (no apple — no trademark headaches), glass-first UI, icon proposals [2a-2c](#) - menu bar glyph - light/dark palette - SF Symbols - mockups with two Smart Scan directions [2d](#) and [2e](#) - SwiftUI style notes. SF Pro only, system materials, no custom fonts.

1 • App icon — "Mela" the MacBook, three proposals

2 • Palette

Light	Dark
Accent	Accent
Accent - pressed	Accent - pressed
Accent tint (selection, chips)	Accent tint (selection, chips)
Window background	Window background
Sidebar glass (ultraThinMaterial)	Sidebar glass (ultraThinMaterial)
Card glass (regularMaterial)	Card glass (regularMaterial)
Border / separator	Border / separator
Text primary	Text primary
Text secondary	Text secondary
Success	Success
Warning	Warning
Danger (destructive buttons only)	Danger (destructive buttons only)

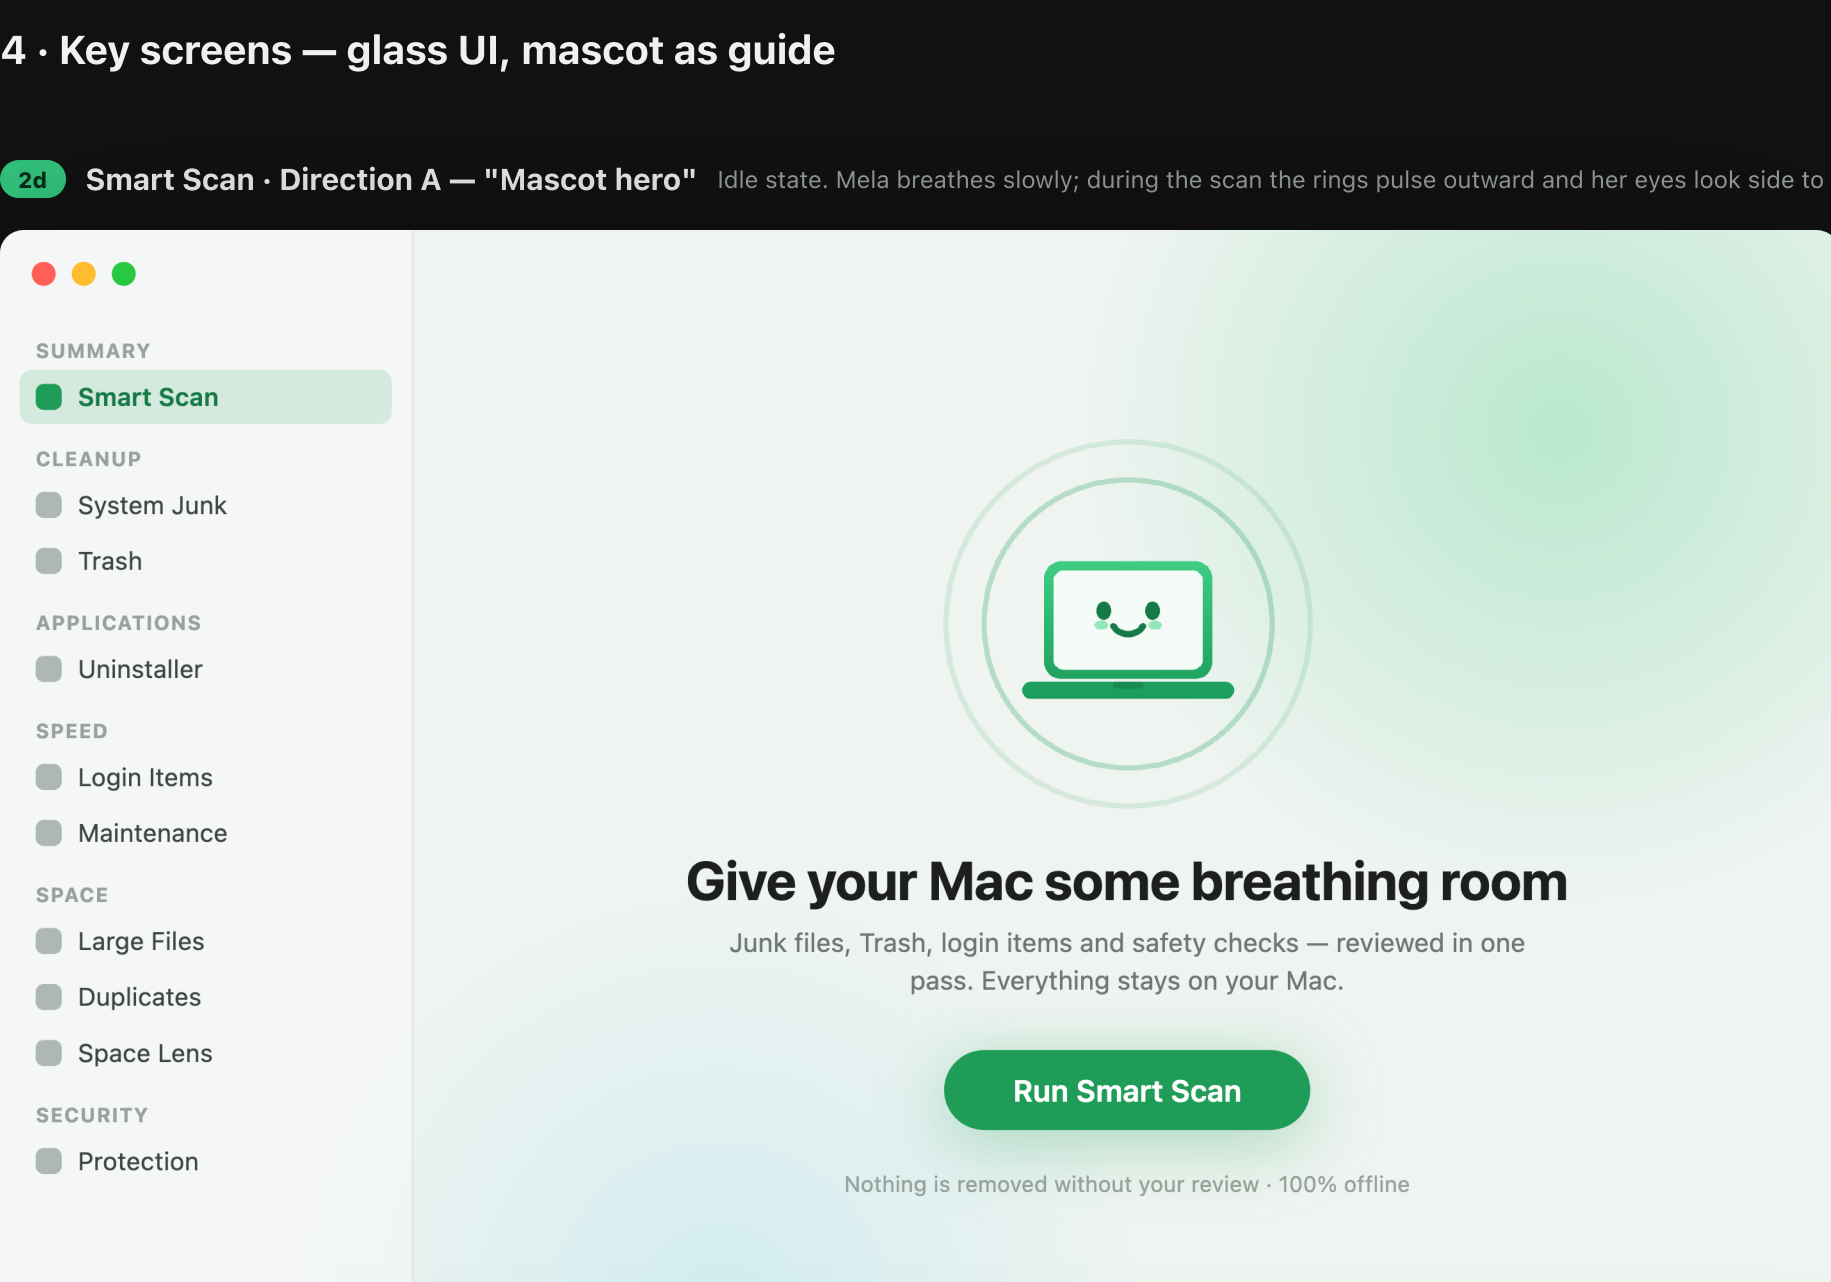

3 • Module icons — SF Symbols

Smart Scan	sparkles	Keep.
System Junk	internaldrive	Keep - fill variant when selected.
Trash	trash	Keep.
Uninstaller	app.dashed	Swap — "dissolving app" reads friendlier than xmark.bin.
Login Items	power	Keep.
Maintenance	wrench.and.screwdriver	Keep.
Large Files	doc.badge.clock	Keep — says "large & old" in one glyph.
Duplicates	doc.on.doc	Keep.
Space Lens	rectangle.3.group	Swap — treemap blocks fit "space" better than circle.grid.2x2.
Protection	checkmark.shield	Swap — reassuring, not antivirus-alarmist.

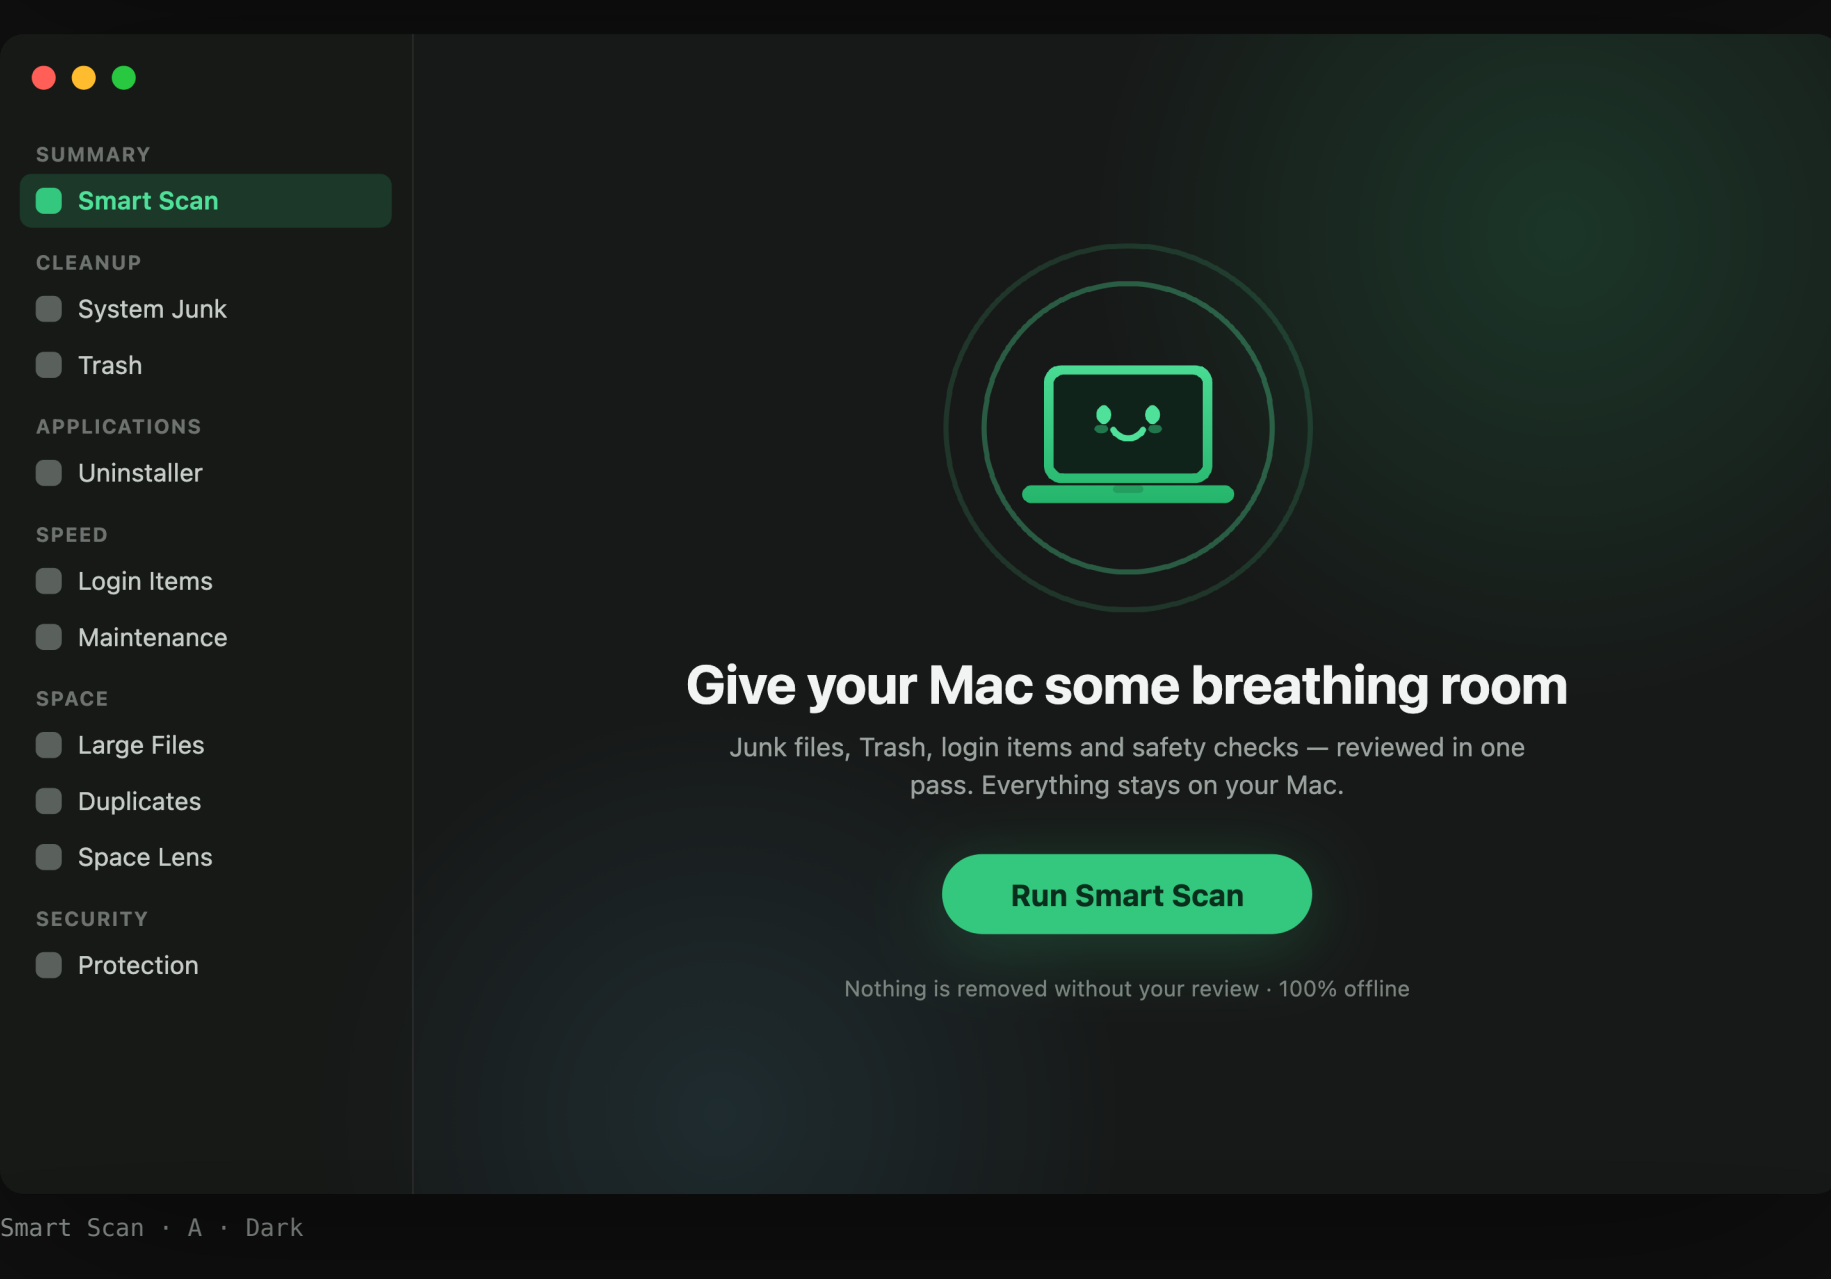

Sidebar rendering: 13 pt, weight: medium, secondary color; selected row = accent-tint capsule + accent-colored symbol. All symbols exist on macOS 13.

4 • Key screens — glass UI, mascot as guide

2d • Smart Scan - Direction A — "Mascot hero" Idle state. Mela breathes slowly; during the scan the rings pulse outward and her eyes look side to side.

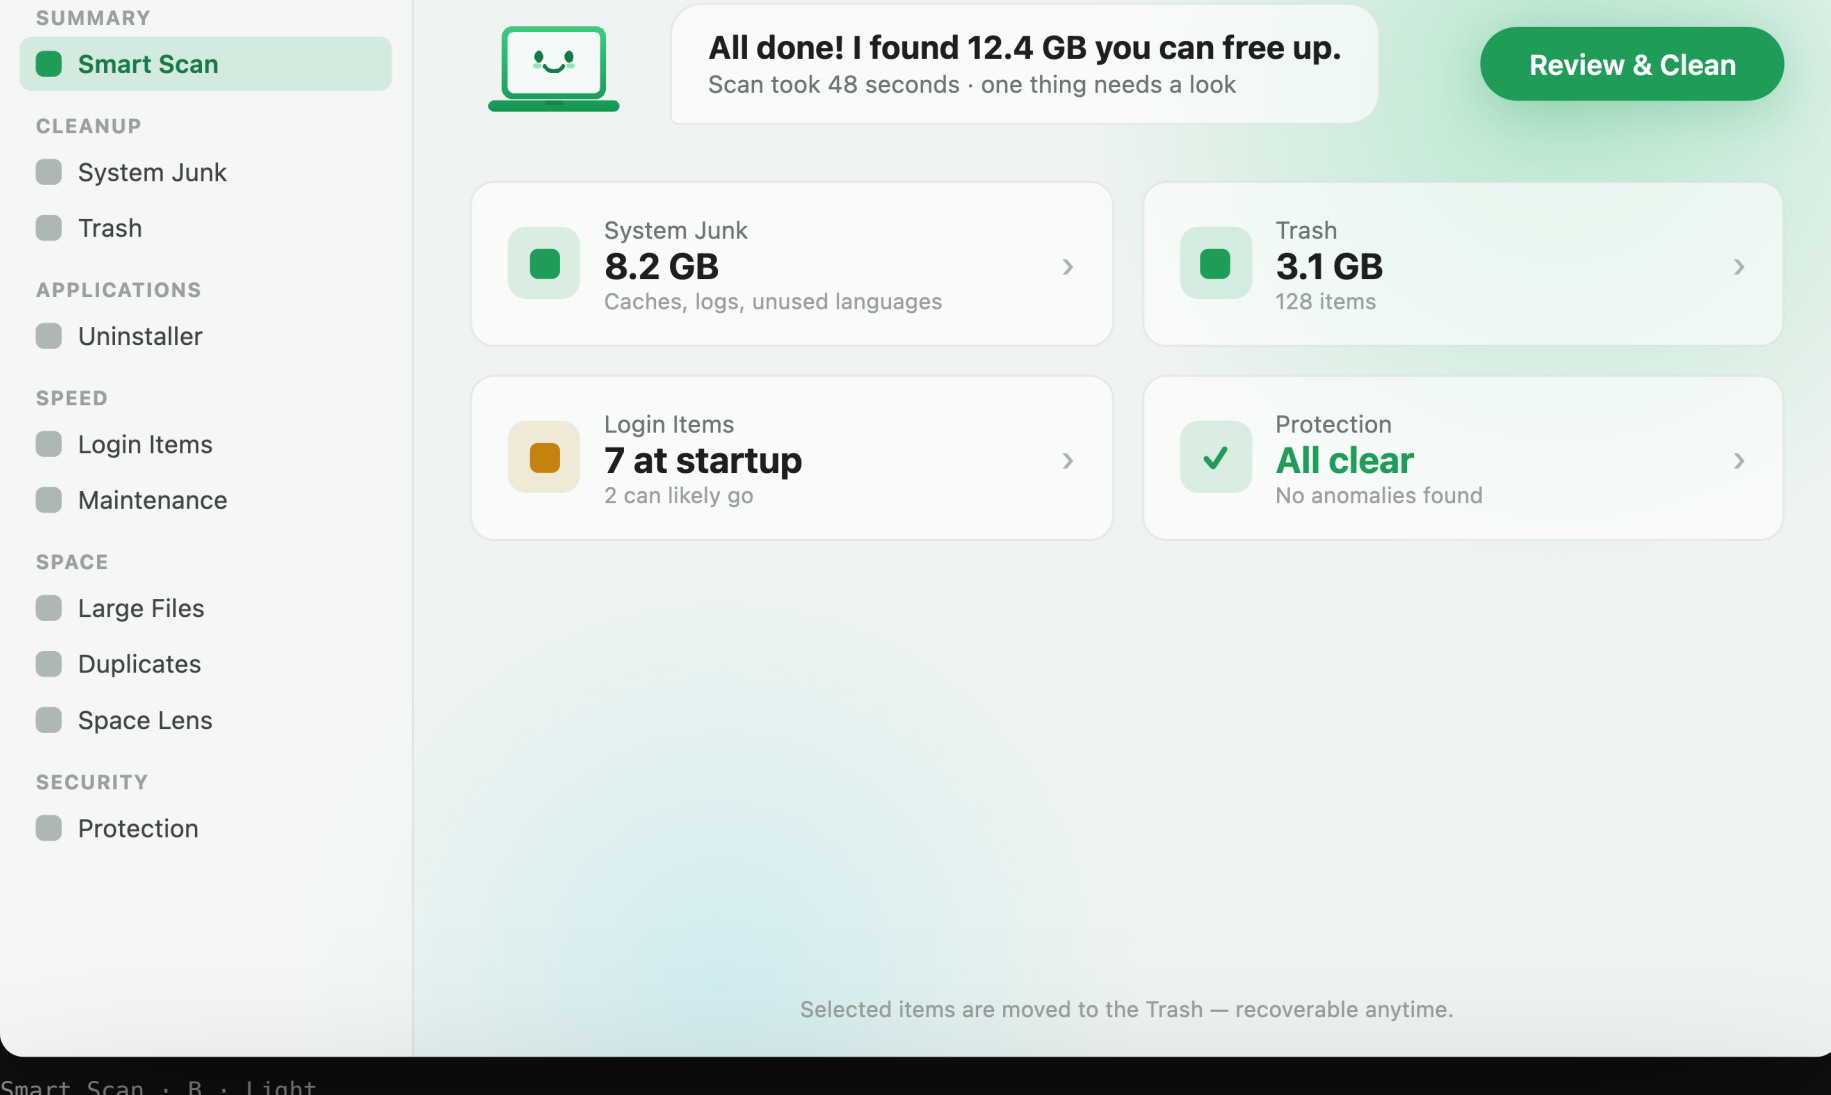

Smart Scan - A - Light

Smart Scan - A - Dark

2e • Smart Scan - Direction B — "Results, mascot speaks" Post-scan. Mela announces the result in a speech bubble; four glass cards deep link into the modules.

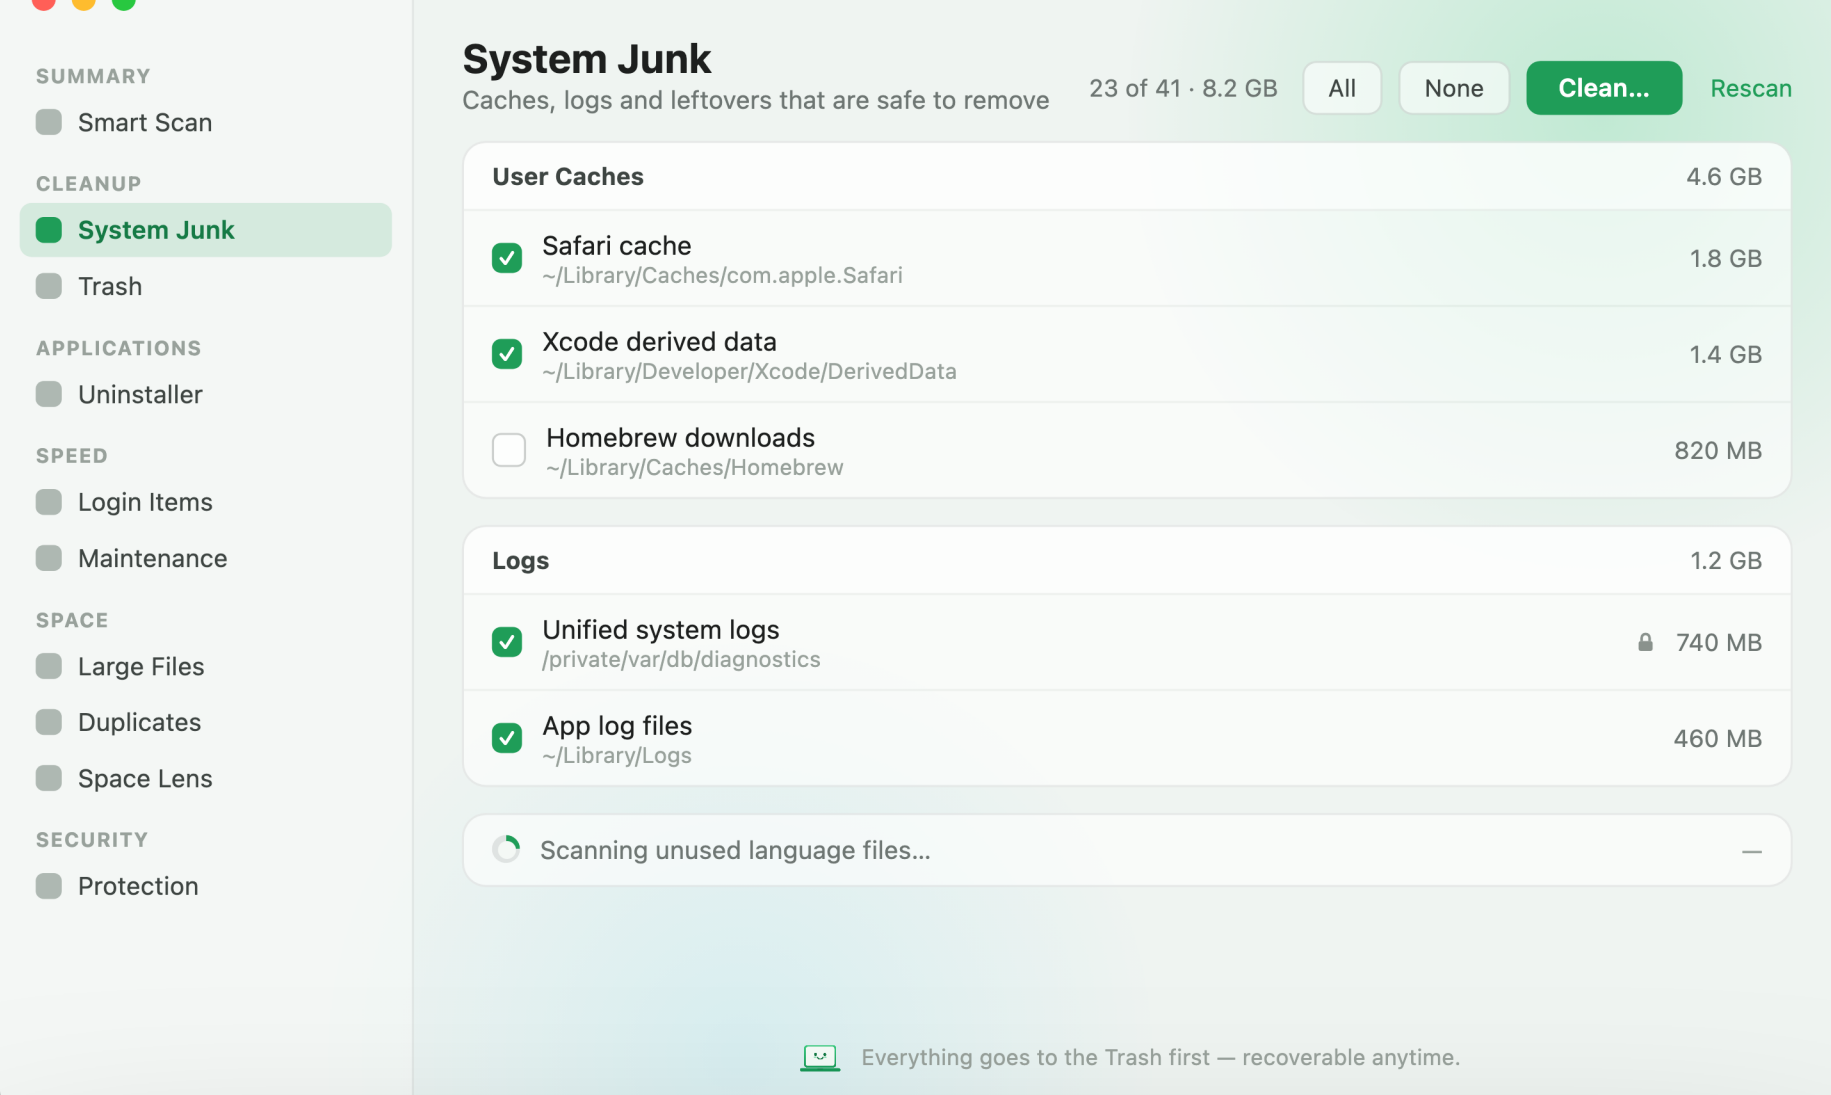

Smart Scan - B - Light

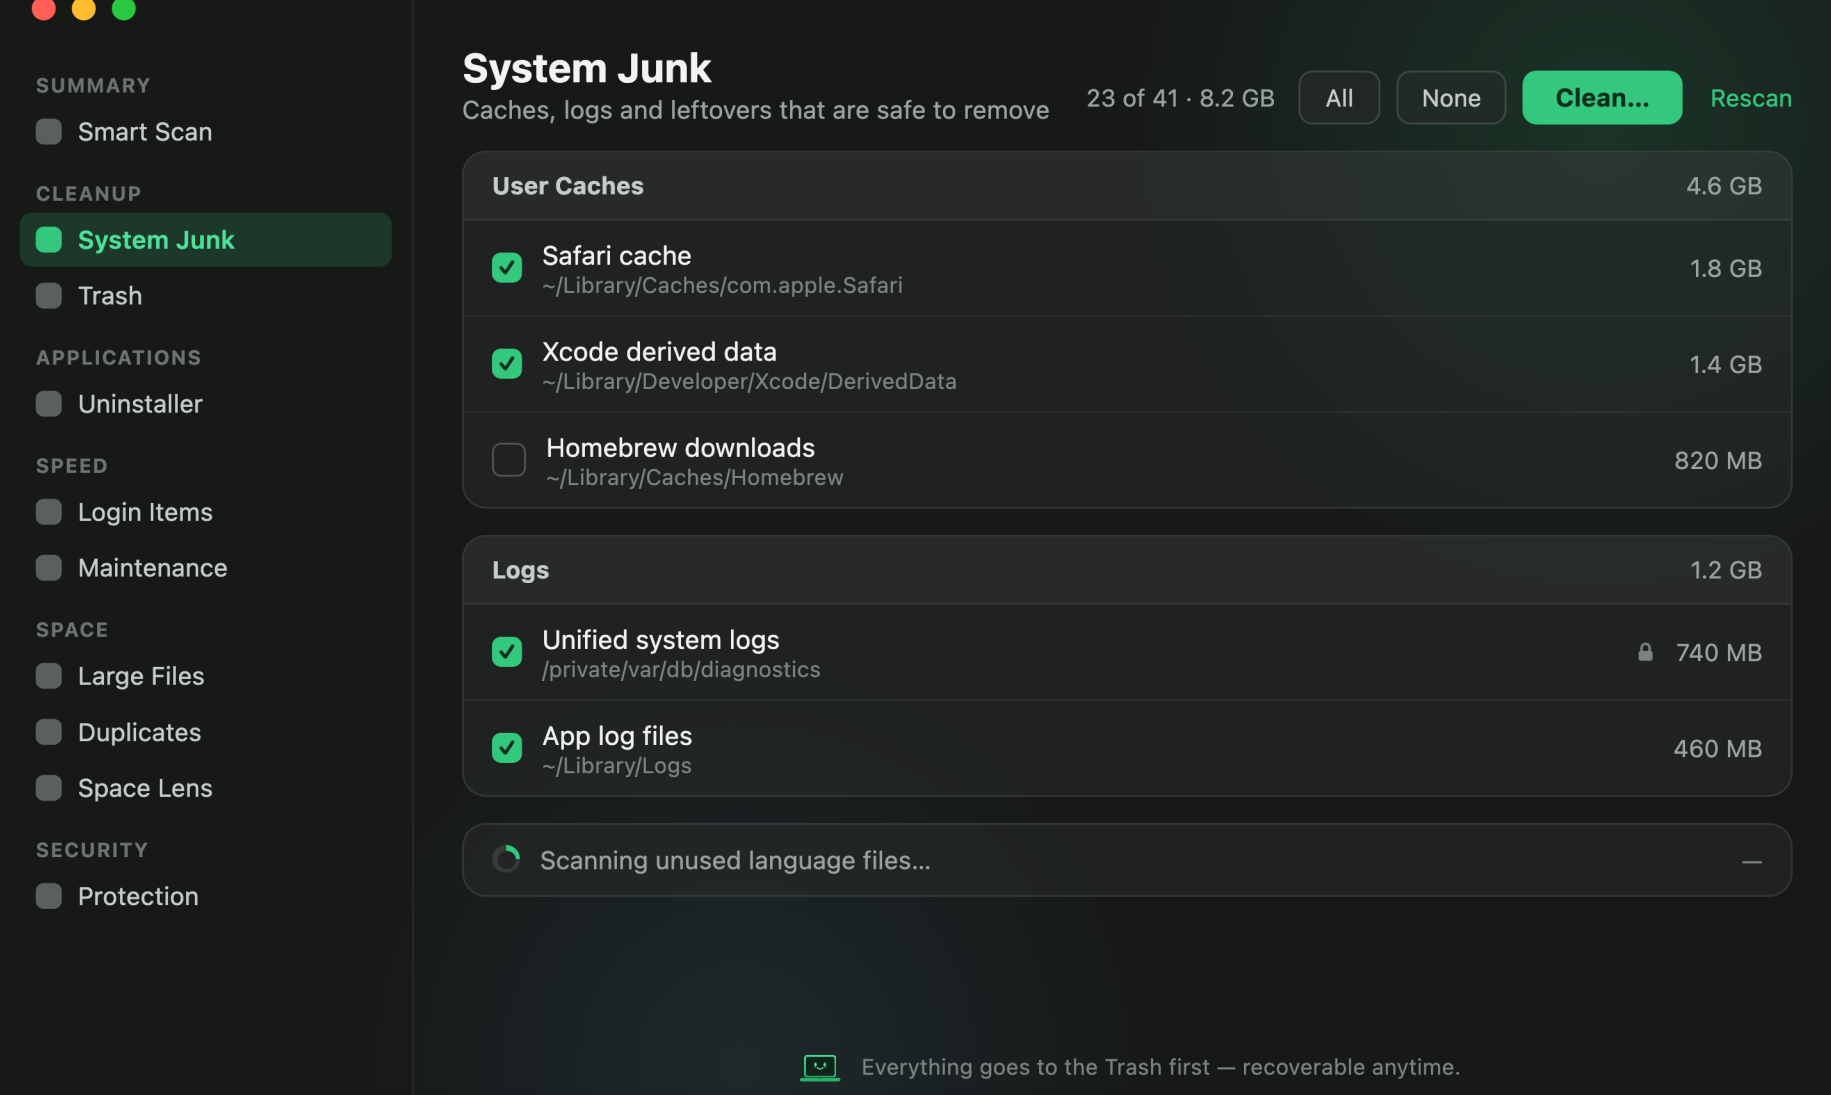

Smart Scan - B - Dark

System Junk — shared "CleanupModuleView" layout Same layout serves Large Files, Duplicates and Protection; Mini-Mela delivers the reassurance line.

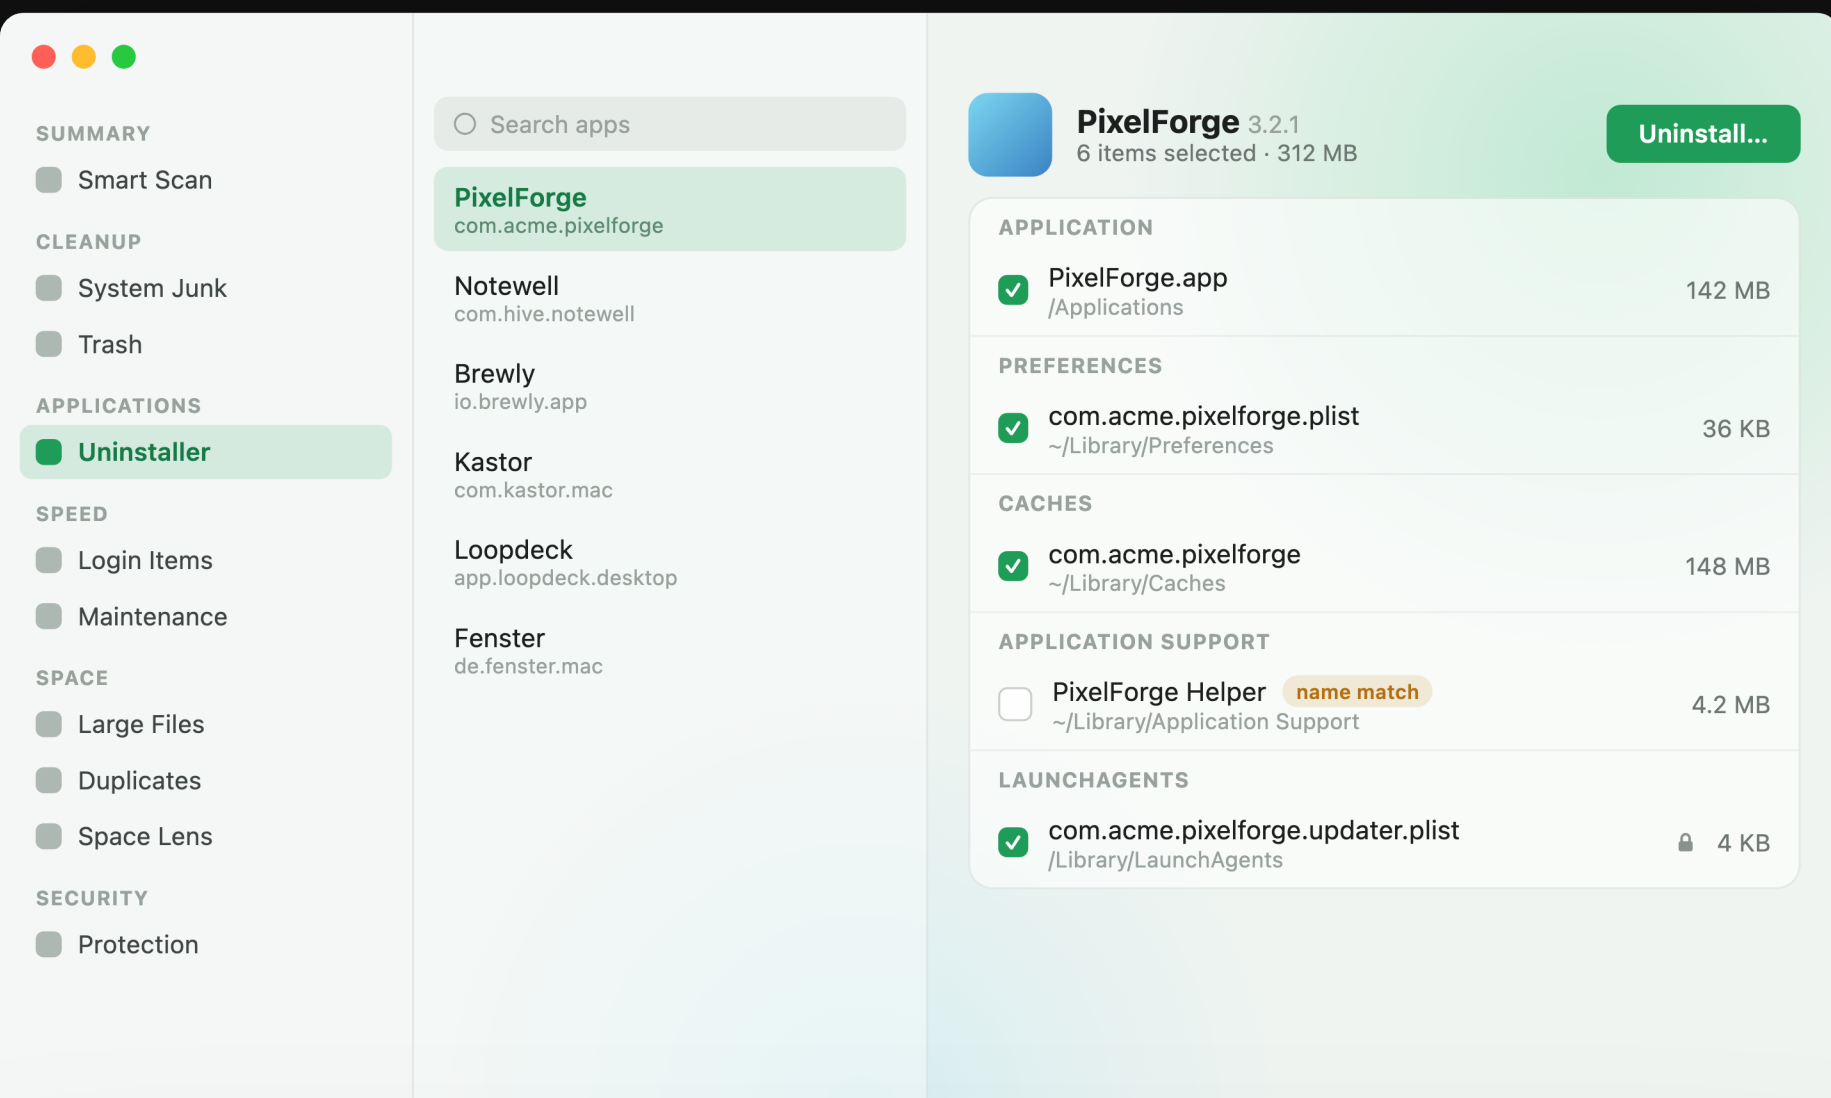

System Junk - Light

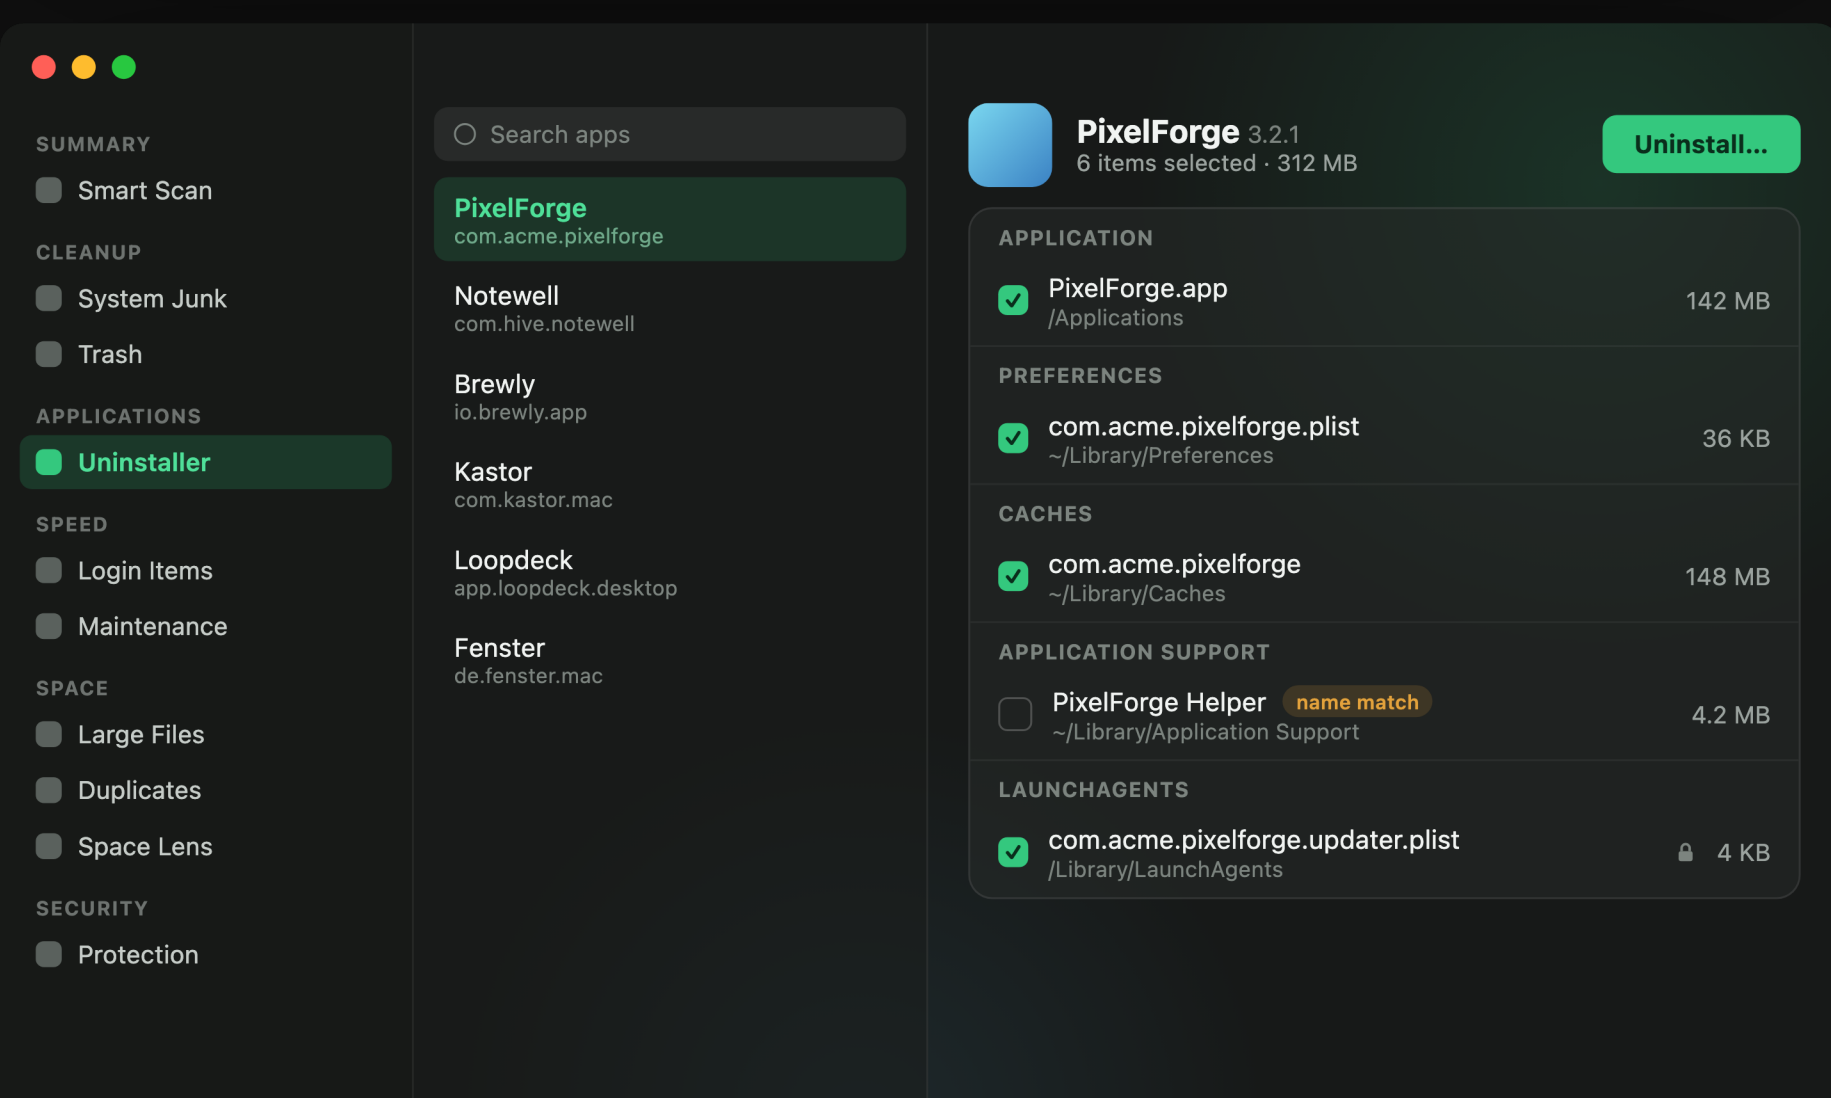

System Junk - Dark

Uninstaller — two-panel layout Orange "name match" badge = low-confidence leftover; lock = admin privileges required.

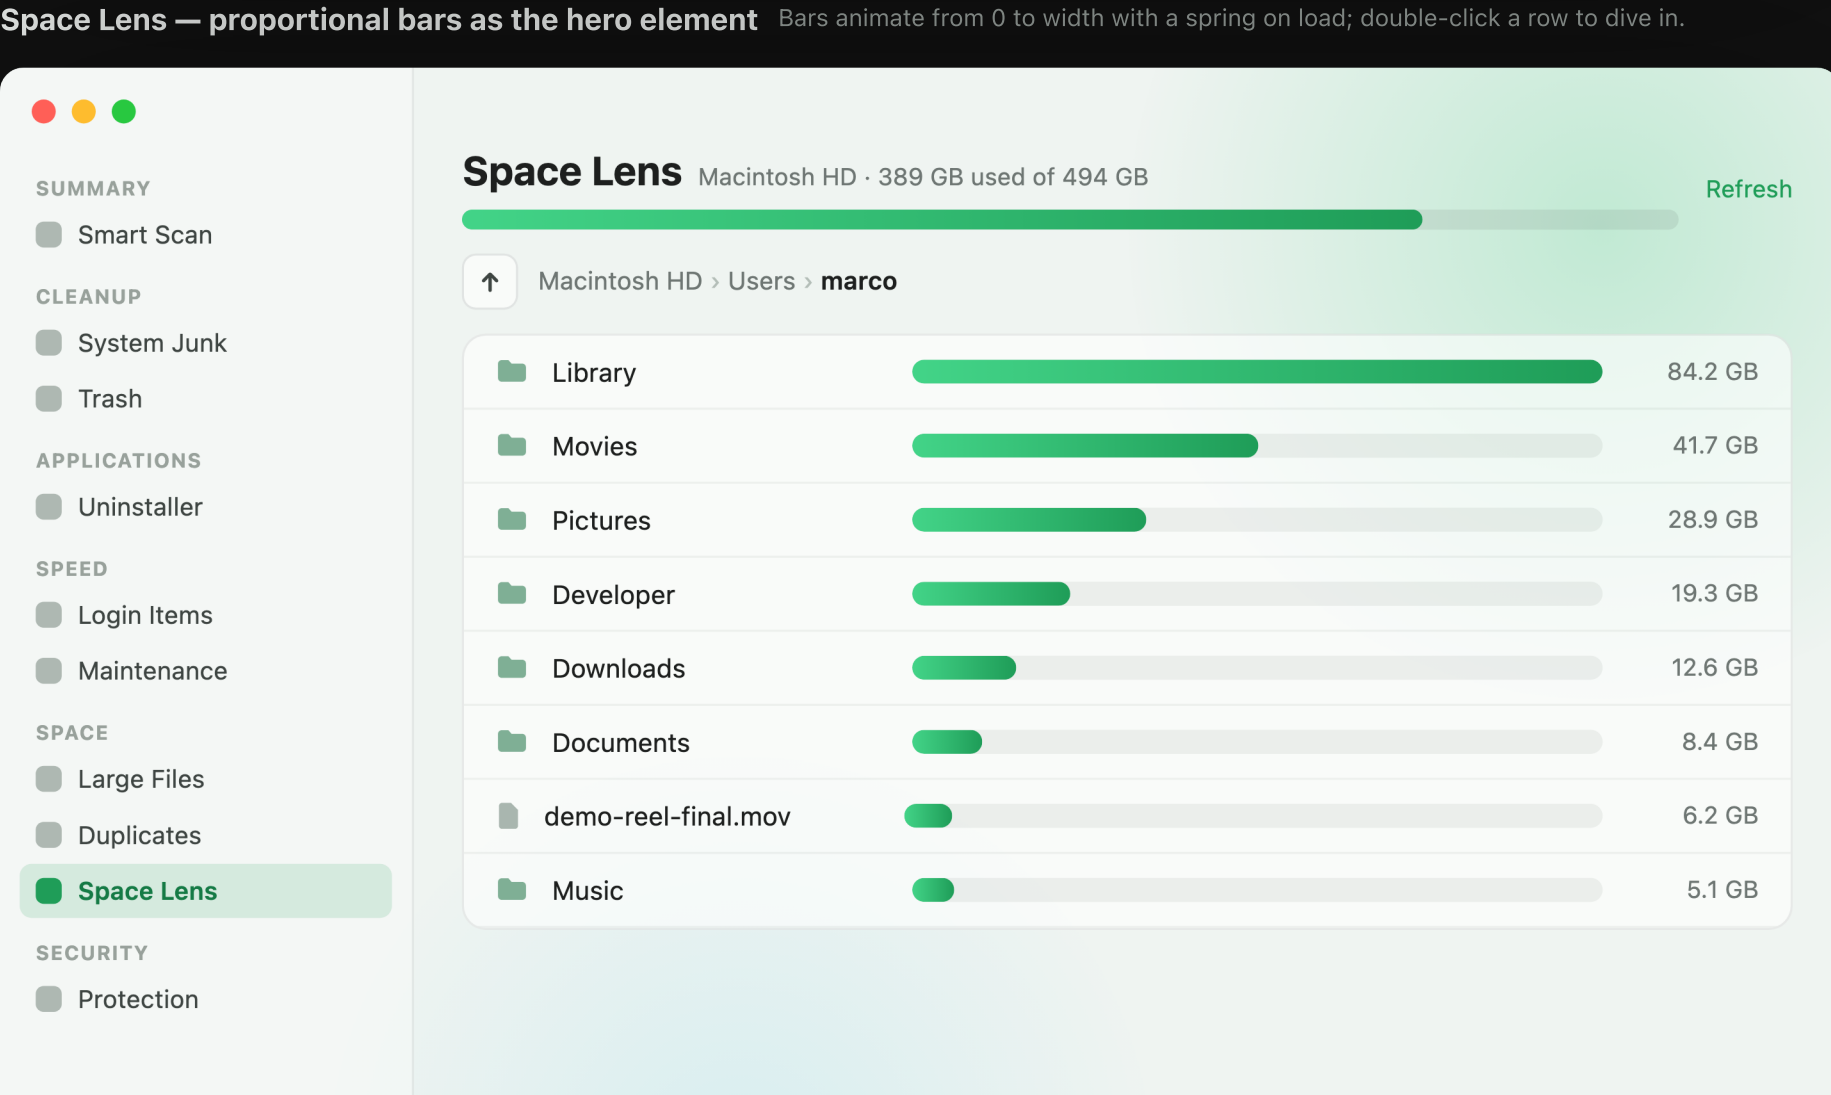

Uninstaller - Light

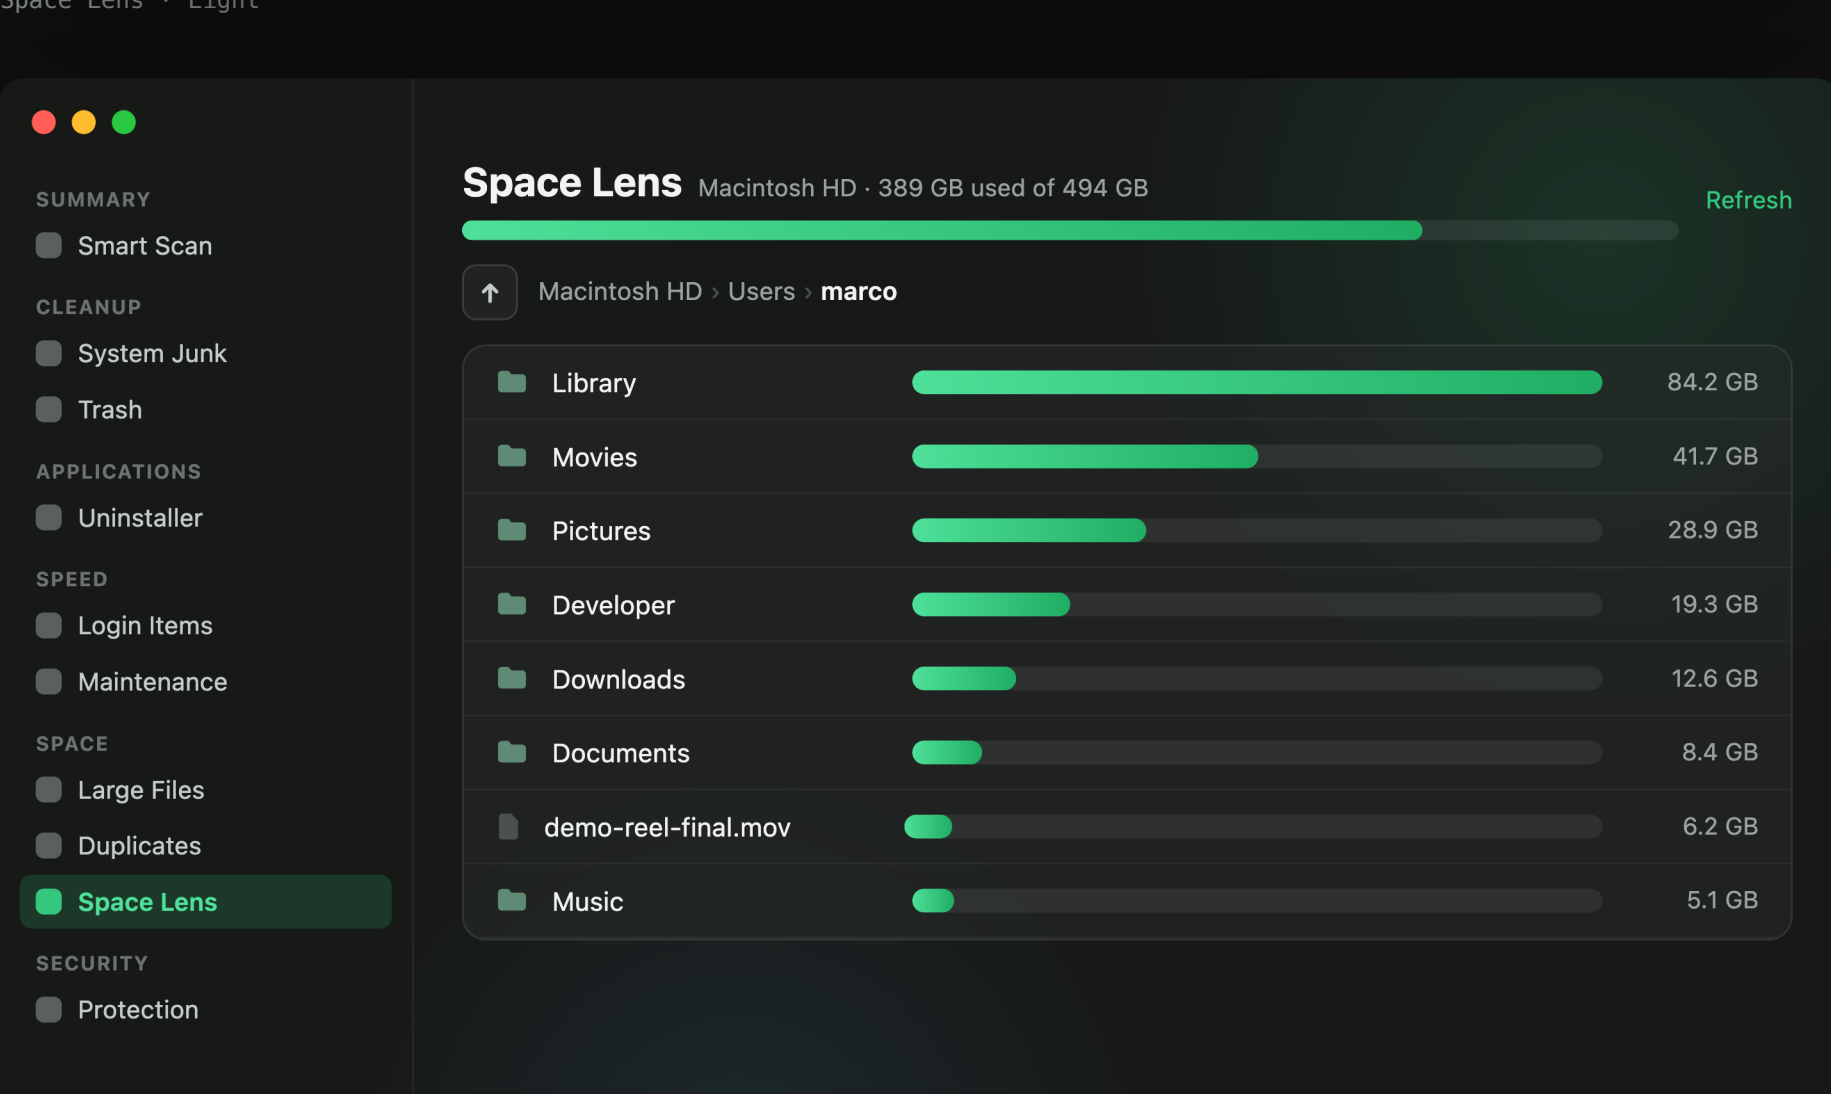

Uninstaller - Dark

Space Lens — proportional bars as the hero element Bars animate from 0 to width with a spring on load; double-click a row to dive in.

Space Lens - Light

Space Lens - Dark

5 • Style notes — SwiftUI recipes

Shape & spacing - Cards: <code>RoundedRectangle(cornerRadius: 12)</code>; buttons: 7 pt; primary CTA is a capsule. 8 pt grid everywhere: window padding 24, card padding 14-16, list row height 44 ("comfortable" density), sidebar min 180 pt. - Type: largeTitle, bold for hero, title3, bold (20) module headers, body 12, caption 11 for paths/detail. - SF Pro only, tabular numerals for sizes.	Materials — the glass recipe - Window: flat background + two soft radial "aurora" blobs (accent green top-right, cool blue bottom-left) drawn with <code>RadialGradient</code>, low opacity. - Sidebar: <code>ultraThinMaterial</code>. - Cards & toolbars: <code>regularMaterial</code> in a <code>RoundedRectangle</code> with a 1 pt <code>strokeBorder</code> at 9-9% opacity. - The blobs are what make the glass visible — without them the materials read as flat gray.	Mela — mascot rules - Built from SwiftUI shapes (<code>RoundedRectangle</code> + <code>Capsule</code> + <code>Circles</code>) or shipped as layered PNGs. - Breathing: <code>scaleEffect(1+0.045, 3.4 s easeInOut, repeatForever)</code>. Scan: rings pulse outward (opacity 0.35+0, scale 1+1.3), eyes offset ±2 pt side to side every ~2 s. - Appears big only on Smart Scan; elsewhere 26 pt next to the reassurance caption. Never blocks content, never talks in alarmist tones.	Micro-animations - Result numbers: <code>contentTransition(numericText())</code> count-up. - Space Lens bars: width 0+value with <code>spring(response: 0.5)</code>, staggered 40 ms per row. - Checkboxes: spring scale 0.8+1 on toggle. - Success: mascot does one happy bobble (scale 1+1.12+1) + green checkmark draws in. - Duplicates "keep" row: accent-tinted background + pin-fill badge "keep", checkbox hidden.
Deliverables <code>/Icons/icon-2a-buddy.png (+2b, 2c) — 1024x1024 masters, squares = shadow-biased in, transparent PNG. Scale down for 16-612 [81x]@2x => .icns.</code> <code>-assets/menubar-glyph-88.png — export at 22/44 px, set isTemplate.</code> <code>-assets/mascot-hero-1.png, mascot-mini-2.png — in-app mascot art, light/dark variants.</code>
